

SMART REMOTE

FOR PROGRESSIVE TEAMS

What we do:

If you are a remote or hybrid team, we help you with:

#churn
#lowmotivation
#leadershipforinnovation
#badcommunication
#lowefficiency
#onboarding
#talentretention

The way we do:

You only need to be #openminded

We care about your vision, so we help you to find your unique progressive way. We start from your input on how you do your business now and how you envision it to be in the future.

page

1

We work in 4 phases:

- Audit
- Going in-depth
- Setting new standard
- Aligning with the new standard

2

For every new project, we start with a kick-off dialogue:

- We agree on clear measurable goals
- Mapping out the trajectory
- Agreeing on the scope and specific focus areas
- Identifying stakeholders
- Follow up with activity plan and timeline proposal

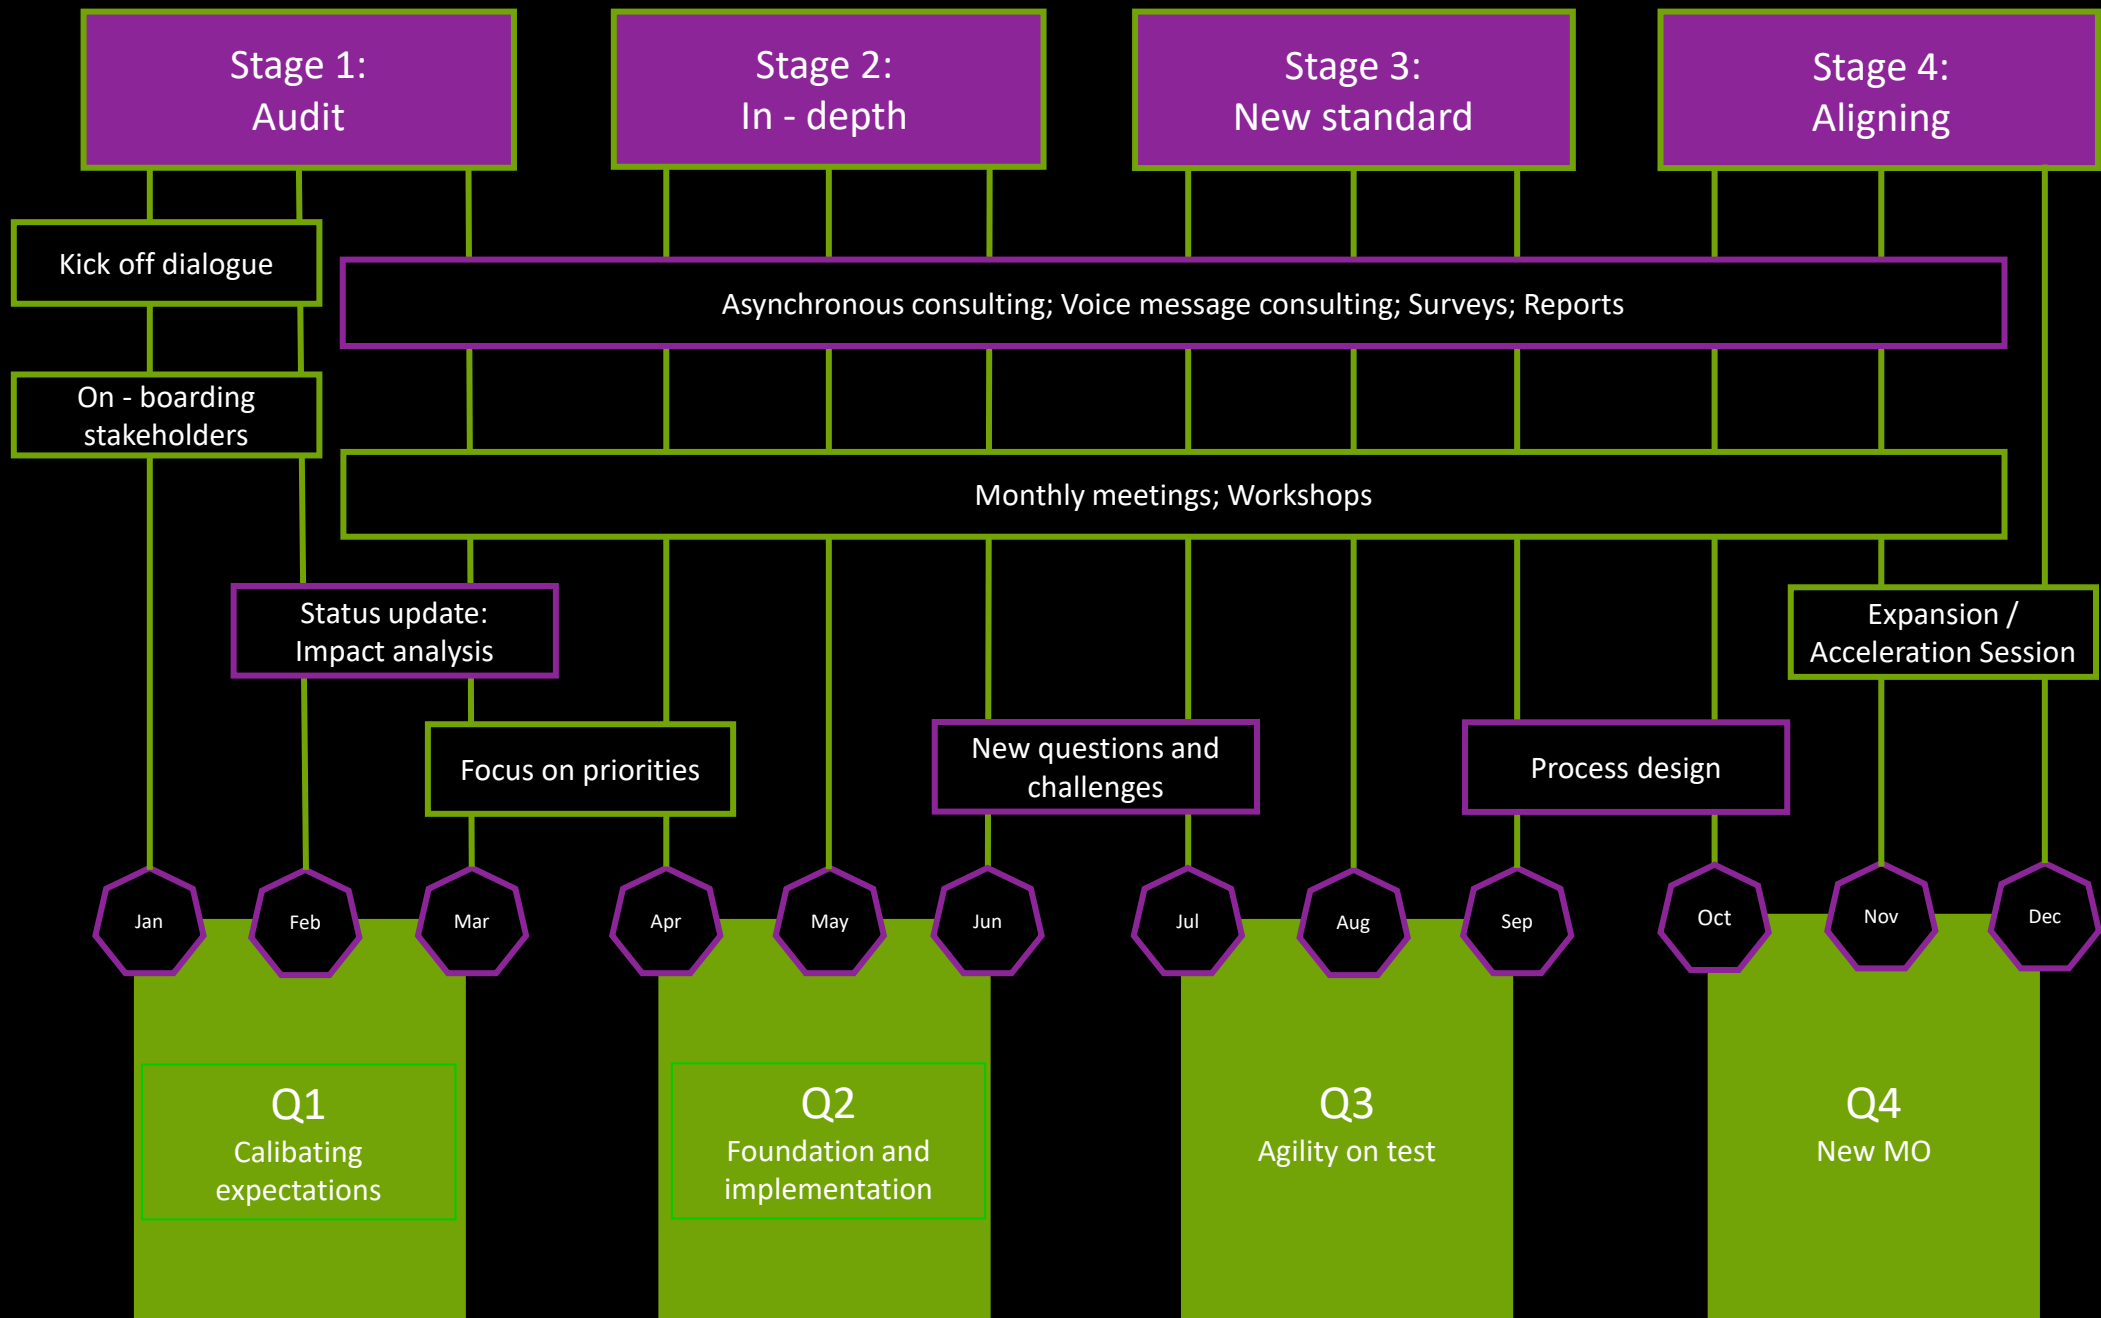

3

Based on the previous, our next step is to agree on the dynamics of work. We know how demanding pace in hybrid and remote companies can be.

Every new project and team requires its personalized rhythm of work. and our uniquely fluid flow enables this customization.

During our collaboration we regularly align with stakeholders on the combination of asynchronous and synchronous activities.

Go to
the flow
matrix

The future of work is here and it is invented in the now.

Remote or hybrid companies have uniquely different challenges than the ones working fully on-site.

We deal with those challenges in areas:

- Productivity/efficiency and collab (team cohesion, team dysfunctionalities, elephants in the room, team bonding, problems with priorities, etc.)
- Innovation potential (knowledge sharing, information flow, gamification, etc.)
- The great resignation (brand embassy, leadership, onboarding process, etc.)
- Personalized Organizational structure and job roles (distributed leadership, succession planning, result-oriented / progress-driven, etc.)

We are here to hear your pain points.

We are sure you have a completely unique challenge for us.

Let's create a new standard together.
